

*...your life  
motion and emotion*

## Wedding Day Photo Montages

Wedding day slide shows, we've all seen them - Yawn!  
Sure, PowerPoint or other common computer software programs can put images on a screen but it's not very entertaining.

**Maverick** puts motion and emotion into our **Wedding Day Photo Montages** using true motion video editing techniques. Every image has movement and motion transitions between images. Elegantly timed to music of your choice or fast paced for fun and excitement. All photos are professionally scanned and colour corrected to get the best possible image quality, often even better than the original. **Maverick** can even add your home video clips and sounds to your production.

Showcase the lives of the bride and groom from those cute baby pictures right on through to the wedding day. All the humour, emotion and evolution of the couple can be showcased to share with all the wedding guests. This one of a kind keepsake is provided in custom album cases in both computer and DVD playback formats for enjoyment for years to come.

Not only can we create an incredible **Wedding Day Photo Montage** for you but we can also provide the equipment to project it on a screen at your wedding reception. **Maverick** can deliver and setup a professional projector system with sound to cover your whole reception hall. Eliminate the hassle of borrowing equipment from friends or employers and let everyone enjoy the evening without having to worry about expensive equipment, call **Maverick**.
